Response to Amendment

The following is in response to the amendment filed March 16, 2005.

Allowable Subject Matter

Claims 1-6 and 9-19 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or suggest a glass melt delivery device having the claimed combinations of features and materials, including a cylindrical heating ring and a delivery nozzle comprising a conical funnel shaped part and cylindrical end piece, whereby the heating ring and cylindrical end piece are a distance apart of 1-3 times the wall thickness of the cylindrical end piece.

Response to Arguments

Applicant's arguments filed March 16, 2005 have been fully considered.

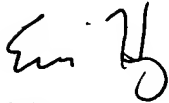

The amendments to the claims have overcome the rejections over Petro (US 4,162,152) and Perkins (US 4,565,559) set forth previously. Applicant argues persuasively that in Petro, the heating device is identically the end piece, and in Perkins, the heating element is not a cylindrical heating ring located within a ceramic component.
